If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on May 27, 2009 has been entered.

Information Disclosure Statement

2. The information disclosure statement (IDS) submitted on May 27, 2009 was filed after the mailing date of the Allowance on September 12, 2007. Allowable Subject Matter

3. Claims 24, 30-32, 35, and 39-57 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: The prior art of record fails to teach or make obvious the steps or means for **"the call connection and the signaling link utilize a Feature Group D trunk between the telephony platform and the PSTN"**, when such trunk is considered within the specific structure of the device recited in claim 24 or the method of claim 35. The prior art of record fails to teach or make obvious the steps or means for

"transporting originating calling party identification information from the gateway through the PSTN to the called subscriber line while the called subscriber line is in an on-hook condition", when the transporting is considered within the specific structure of the method of claim 30. The prior art of record fails to teach or make obvious the steps or means for **"the first telephone switching office is adapted to recognize a voice call arriving from the gateway, obtain originating caller identification information from the gateway, and signal the originating caller identification information to the second telephone switching office"**, when such caller identification information is considered within the specific structure of the device recited in claim 39. The prior art of record fails to teach or make obvious the steps or means for "sending a first signaling message over a packet*switched data network to the gateway using the identity of the gateway, the first signaling **message including the telephone number of the called party and a telephone number of the calling station"**, when the sending is considered within the specific structure of the method of claim 42.
